

Christmas Tree Design Competition

To cultivate students' creativity and raise the awareness of environmental protection, our school conducted an Eco-Friendly Christmas Tree Design Competition. It was an interclass competition as well as an inter-school competition involving primary schools throughout Hong Kong.

There were a total number of 106 entries from 5 primary schools. Contestants were invited to decorate their christmas trees with eco-friendly materials. The prize-giving ceremony was held on the Teacher-Student Day on 20th December, 2019.
